<b>RE</b>	Restricted to a group specified by the consortium (including the Commission Services)	
<b>CO</b>	Confidential, only for members of the consortium (including the Commission Services)	

The EDIT coordinator CDC has elaborated an informatic tool for managing NoEs (IMT: Information Management Tool), this tool put at the disposal of the Network is accessible online and allows collection of information about the Network activities from the researchers and persons responsible for the work (Team leaders).

According to the EDIT Consortium Agreement, each partner shall communicate in IMT all data on working time to be charged for the work in each Workpackage and costs incurred. This allows the CDC to inform every six months the Network Steering Committee about inputs (timesheets, expenditures...) mentioned by the partners in the IMT.

For the first reporting period, the first Financial report has been provided by the CDC on Month 8 (November 2006) for the second meeting of the Network Steering Committee, instead of Month 5 (August 2006), because of the late start of most of the workpackages' activities due to late transfer of the EC pre-financing, it was irrelevant to produce the report earlier. Please see tables provided by the CDC below, in Annex 1 First Financial report, p. 3 to 30

The second Financial report has been provided by the CDC on Month 11 (February 2007) for the third meeting of the NSC. Please see the tables provided by the CDC below, in Annex 2 Second Financial report, p. 31 to 41.

Data provided in the second Financial report may be slightly different from data included in the Management report, because the First reporting period ended on February 28<sup>th</sup> 2007, and it was of course not possible for the partners to have all the relevant data recorded before this date. Thus the definitive data recorded in the IMT are available in the Management report.
